Brush X1 (you may want to choose the larger one, it will be easier to paint the whole box) 5. So I did this project because I think it will be a good way to prevent children from putting their fingers on the fan. Breadboard x12. Connect the black GND wire to the hole which has a minus (-) sign on the breadboard.Buzzer: Connect the positive terminal with pin 8 of Arduino and Negative Terminal to GND (digital).Ultrasonic Sensor: Connect the VCC to the orifice, which has a negative sign (-) in the bread bowl. Ultrasonic distance sensor X15. Connect the Trigger PIN to pin 9 and ECHO PIN to PIN 10 from Arduino. In order to make the detector, you would need to prepare the following materials: 1. I used a box with 22 \* 22 \* 12 \* 8cm and just fits.) 2. Thus, the wires, ultrasonic distance sensor, and the doorbell will not fall off easily. Pencil x13. Acrylic turpentine4. If the children's fingers are too close to the ventilator; can cause serious injury. Finish!!!!!! Want to see the final work Click here. Thank you for visiting this site, see you next time! Choose a random box that can fit your design, but your maximum size should not be about the size of the spot you want to place on the fan. To the box: 1. Parents can easily notice the sound of the detector and immediately their children from the fan. 5V Buzzer x14. Ceramic fan heaters Mini Capsule This is a detector that will remind the parents when their children place their finger too close to the fan. So if the project has problems, I'm able to fix the problems quicker. Connect GND of the Ultrasonic Sensor to the hole that has a negative sign(-) on the breadboard.Third Step: Connect the BuzzerBuzzer: Connect the Positive terminal with pin 8 of Arduino and negative terminal to GND (digital).Notes: You can copy the code from hereint UltrasonicSensorCM(int trigPin, int echoPin )/Ultrasonic Sensor Code Auto Generated Return CM max distance 200( long duration; pinMode(trigPin, OUTPUT); pinMode(echoPin, INPUT); digitalWrite(trigPin, LOW); delayMicroseconds(2); digitalWrite(trigPin, HIGH); delayMicroseconds(20); digitalWrite(trigPin, LOW); duration = pulseIn(echoPin, HIGH); duration = duration / 59; if (duration < 2) || (duration > 100) return false; return duration;} void setup() { // put your setup code here, to run once: digitalWrite( 9 , LOW ); //set ultrasonic sensor trigPin }void loop(){ // put your main code here, to run repeatedly: if ( UltrasonicSensorCM( 9 , 10 ) == 0 ) { tone(8, 25, 500); //buzzer or speaker frequency } else { noTone(8); //stop generating the tone }}For this section, you can cover your project with a protective covering or decoration. Cut a smaller hole beside the box that can fit your wire connect to the computer4. Paint the box with Acrylic Turpentine.5. Let the box dry.6. Put the final project inside the box7.
